Lender Toolkit™

FFIEC Lookup

The FFIEC Lookup tool in Lender Toolkit's Toolshed adds a custom input form to Encompass that allows users to do the FFIEC lookup with the click of a button. The tool makes use of the FFIEC APIs to download all the data you need into the loan.

⚡ PowerTools™

KEY FEATURES:

🕐 Time Savings

Eliminate going to external sites to gather information like the MSA Number, County and State Codes, Census Tract, and other census data useful to making underwriting decisions.

🔄 Automatic Updates

Admins can trigger the tool to run automatically whenever there is a field change, milestone completion, etc. This ensures that the data has been added to the loan eliminating delays is your workflow.

⚙ Automatic Data

The automatic download of data ensures that no typos are present, and speeds up the process of gathering census data for each loan. Minutes saved on each loan translate into hundreds of hours gained annually, enabling faster, more efficient closings.

API VERSION NOW AVAILABLE!

FFIEC tool has been completely re-written using the API. The tool can be run along-side the previous SDK version for evaluation and testing.
